

What is IDrive exactly?

IDrive is an easy to use, secure Online Backup application. You've got lots of files and we've got lots of storage - it's like a match made in heaven!

What does IDrive cost?

We offer 5 GB of storage for FREE! That should cover most of your important office/work files, but for all of your pictures and databases, you should probably upgrade to 150 GB of storage for only \$4.95/month. That's about the price of a latte at your favorite coffee shop.

Why should I backup my data?

If you're really asking this question, you also probably think your computer's DVD drive is a "cup holder." Your data is very important and if your hard drive crashes, you could lose more than you realize.

OK, OK... but why use IDrive?

Well, because traditional backup methods are not always reliable. Here's what analyst groups like Gartner and IDC have to say about data loss:

- ◆ 60% of corporate data resides on PC desktops and laptops
- ◆ 32% of data loss is due to user error
- ◆ 10% of laptops are stolen annually
- ◆ 5% of laptops suffer hardware failure annually
- ◆ 70% of all tape restores fail

Wouldn't you be better off backing up your data online, fully protected, encrypted and accessible from ANYWHERE?

For any queries, email us at support@idrive.com or call 1-866-748-0555 ext 2 on business days from 6.00 AM to 6.00 PM PST

How do I get started with IDrive?

That's simple, just go to www.idrive.com and create an account. If you're just trying us out, go ahead and get 5 GB of storage for FREE and see how you like it.

Or if you're ready for the big leagues, go ahead and get 150 GB for only \$4.95/month. Then you can backup all your important files.
