Who Recommends IDrive Online Backup?

Why Choose IDrive Online Backup?

- **Military Grade Security -** We use 256-bit AES encryption with an optional private key.

- **Users -** Add unlimited users within your storage space and monitor via a centralized administrator console.

- **Server Cloud Backup -** Backup SQL, Exchange, Hyper-V, SharePoint, Oracle, Microsoft 365 Mailbox, VMware, and Linux servers.

- **Google Workspace and Microsoft 365 Backup** - Secure your organization's Google Workspace and Microsoft 365 account with daily incremental backups.

- **Linux Server Backup -** Backup connected Linux machines remotely via the GUI on the web interface or individually using the IDrive scripts package.

- **Clone / Computer Backup -** Perform sector-level or file-level backup to secure the entire computer, and restore it to its initial state.

- **IDrive® Thin Client -** Deploy the IDrive® Thin Client application on your computers with minimal configuration and enable data backup via the web.

- **Manage Computers -** Manage data backups, restores, application settings, etc., on your distant computers via a web-based console.

- **IDrive Express™ -** Quickly backup and restore data via physical shipment of the Express device. The service is free 3X a year for business users.

- **Single Sign-On -** Configure your IDrive® Enterprise account for SSO with any IdP of your choice and enable hassle-free sign-ins.

- **Business Compliance -** Assistance to comply with regulations like HIPAA, SOX, GLBA, SEC/FINRA, and PCI DSS.

IDrive®

How Secure is IDrive Online Backup?

- Your data is encrypted with military-grade 256-bit AES encryption on transfer and storage. On signup, you can choose a private encryption key, known only to you and not stored anywhere on our servers.

- Your data resides at our data centers built to withstand natural disasters and monitored 24/7/365 against physical and network security threats.
