

# IDrive Cloud on-premises backup

with the flexibility to access and manage data from anywhere

Starts from **6 TB**  
and scales up to 100's of TB's

IDrive assists businesses in keeping their data protected via IDrive Vault (Private Cloud) deployed on premises or on AWS, and to manage data from anywhere, anytime.

## Why IDrive Vault (Private Cloud)?

-  Familiar interface, exactly like IDrive Cloud Backup.
-  Manage backups, user accounts and more from anywhere via the Dashboard.
-  On-demand scalability that is cost effective and easy to manage.
-  Pre-configured rack mountable servers shipped to your door.
-  Adheres to most data security and compliance requirements as data is encrypted on storage.
-  Private Cloud can be setup on-premise or at your preferred data center.

## Partner Benefits

- > Earn 30% recurring revenue for the life of the account
- > Protect your opportunities with deal registration
- > IDrive provides comprehensive setup assistance
- > Free dedicated support
- > Easy deployment

### On Amazon Cloud

Brings the benefits of AWS cloud with a dedicated infrastructure for your data, within your geographic region (especially for Non-US users) for faster backups and restores.

## Specifications

### Hardware

#### Components

**Storage:** 6TB to 400 TB and scale up to hundreds of petabytes.

**CPU:** The latest generation of multi core Intel XEON CPUs.

**Power Supply:** Hot-swappable redundant power supplies.

**Network Adaptor:** 1GbE and 10 GbE interfaces.

**Drive Bays:** Up to 60 hot-swappable drive bays.

**Chasis Configurations:** 1U, 2U and 4U high density storage.

**Warranty:** Standard 3 year limited warranty.

### Software

#### IDrive Client

**Multiple Device Backup:** Backup multiple devices into a single account.

**Versioning:** Restore up to 10 versions of backed up files.

**Real-time Backup:** Automatically backs up file modifications at time intervals, set by you.

**True Archiving:** Store your files in the cloud, as long as you want.

**Server Backup:** Backup your running databases and servers without any downtime.

**Disk Image Backup:** Backup entire drive by creating a complete copy of the original drive.

#### Dashboard

**Create Users:** Create new user account within your storage space and define their encryption.

**Manage:** View the information about each user's storage utilization and the most recent backup.

**Propagate Settings:** Make changes to backup sets and settings across all devices.

**Remotely Install:** Upgrade to the latest version of the client application remotely.
